

- What is litter?
- Why do people litter?
- Who and what can get hurt?

Litter is found along roads, in parks and on school property.

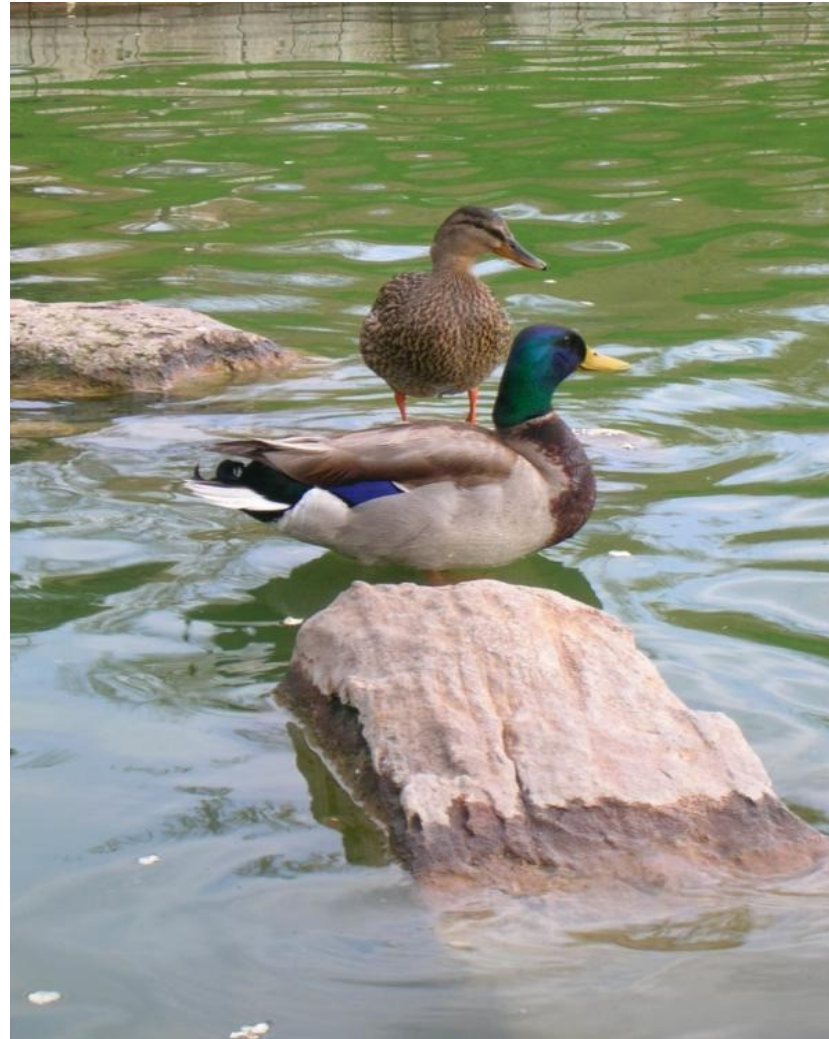

Storm Drains

Storm drains lead to waterways!

Is there a stream, river or pond near your community?

We love to spend time at the lake!

Let's keep it clean and litter-free!

Do you have fun at the beach?

What will you do with your **trash** when you are at the beach?

Sandy Hook Beach, July 2012

PLEASE use trash and recycling receptacles.
If not, carry your trash and recyclables home with you and dispose of them properly!

Litter is dangerous!

**Animals mistake litter for food
and try to eat it!**

Discarded fishing nets and ropes are very dangerous!

Plastic six-pack holders entangle animals.

Plastic bags look like jellyfish, and some sea creatures eat the bags.

It's in our hands.

**Please do your part to reduce, reuse, recycle
and respect our planet Earth!**

Morris County Clean Communities

Campaign for a litter-free Morris County!
Thank you for **NOT** littering!

What is Household Hazardous Waste (HHW)?

Examples of hazardous waste:

- Pesticides, herbicides and fertilizers
- Household cleaning products
- Oil-based paints and stains
- Paint thinners and solvents
- Motor oil, antifreeze, gasoline, kerosene transmission, steering and brake fluids
- Chemistry sets, mercury and mercury containing devices

Fish die in polluted water!

There are several causes of ocean pollution including oil pollution, marine debris, toxic materials, and ocean dumping.

Compact fluorescent bulbs

contain mercury!

Electronics (E-waste)

- Computers
- Monitors
- Printers, faxes, keyboards & peripherals
- Scanners
- Phones
- Televisions

Don't put electronics into the trash!

Be Responsible

Protect our Planet Earth

Be sure to dispose of household hazardous waste and electronics in a responsible manner.

Let's do our part!
